# Help create a more equitable workplace

Inclusion, Diversity and Equity (IDE) and Health Equity training for all employees

## Course objectives:

- Recognize implicit bias and its effects.
- Describe how implicit bias and social determinants of health contribute to disparities in health care.
- Recognize strategies to mitigate implicit bias.
- Describe at least one tactic that you can bring to your teams to help elevate equity for patients and employees.

**Continuing education credits are available. Register via ULearn.**

All employees are asked to complete this vital workshop prior to our new evaluation review date in the fall. Completing this 90-minute virtual course will help our organization be a more equitable workplace, and will be considered an achievement on your annual evaluation with your manager.
